# Office Action Summary

Application No.

09/702,428

Applicant(s)

YU, CHRIS S.

Examiner

JAGDISH PATEL

Art Unit

3624

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 31 October 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-35 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-35 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 7/28/2004
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

Art Unit: 3624

DETAILED ACTION

*Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-13, 15-16, 18-30, 32-33 and 35 are rejected under 35 U.S.C. 102(e) as being anticipated by Drummond et al. (US 6,598,023) (hereafter referred to as Drummond).

As per claim 1, Drummond teaches a method for remote operator interface with a self-service financial terminal, comprising:

allowing the remote operator to access the self-service financial terminal via a browser application of a computing device;

(see Figure 2, a customer is allowed to access ATM 12 via browser 76 of computer 34, see col. 7 for further description, see also col. 11 L 40+ )

receiving the remote operator's entry of a user identification;

(col. 12 L 28+ "input of the card by the customer to the card reader" col. 13 L 9-10 "PIN number")

Art Unit: 3624

displaying a menu of self-service financial terminal operator functions for the remote operator;

(col. 17 L 1+ .. These messages may include information used to generate screens which prompt the customer to select a transaction.)

receiving the remote operator's selection of at least one of the self service financial terminal operator functions; and

(col. 17 L 1+ These messages may include information used to generate screens which prompt the customer to select a transaction. For purposes of this example, it will be assumed that the customer inputs at the touch screen 30 a selection which corresponds to the dispense of cash, which is a common transaction at an automated banking machine.)

allowing the remote operator to access an application for the selected self-service financial terminal operator function.

(Col. 17 L 11+ Server 90 then responds by sending another HTML document to the banking machine which prompts the customer to select an amount. Again the customer may input a selection on the touch screen which indicates the amount of cash requested by the customer. This HTTP message passes through the HTML document handling portion and the browser 76 to the home server 90.)

**Claim 2.** The method of claim 1, wherein allowing the remote operator to access the terminal further comprises allowing the remote operator to access the self service financial terminal via the browser application of the computing device coupled to the self-service financial terminal.

(col. 17 L 10+ This HTTP message passes through the HTML document handling portion and the browser 76 to the home server 90.)

**Claim 3.** The method of claim 2, wherein allowing the remote operator to access the terminal further comprises allowing the remote operator to access the self service financial terminal via the browser application of the computing device coupled to the self-service financial terminal over a network.

(refer to Fig. 10)

Art Unit: 3624

**Claim 4.** The method of claim 1, wherein allowing the remote operator to access the terminal further comprises allowing the remote operator to access the terminal via the browser application of a personal computing device.

(refer to Fig. 2 browser 76 associated with computing device 12)

**Claim 5.** The method of claim 4, wherein allowing the remote operator to access the terminal further comprises receiving the remote operator's entry of a URL address for the terminal by the browser application of the personal computing device.

( col. 22 L 35+ the HTML document handling portion is operative to configure a message addressed to access a URL address that corresponds to the indicia on the customer's card or other address responsive to such indicia.)

**Claim 6.** The method of claim 5, wherein allowing the remote operator to access the terminal further comprises receiving the remote operator's entry of the URL address for a web server application of the terminal by the browser application of the personal computing device.

( col. 22 L 35+ the HTML document handling portion is operative to configure a message addressed to access a URL address that corresponds to the indicia on the customer's card or other address responsive to such indicia.)

**Claim 7.** The method of claim 1, wherein allowing the remote operator to access the terminal further comprises mutually authenticating the terminal and computing device with one another.

(col. 8 L 65-66..Certain applets manage security and authenticate entities that use the ATM. )

**Claim 8.** The method of claim 1, wherein receiving the entry of the user identification further comprises receiving the remote operator's entry on a logon screen displayed at the computing device.

(col. 11 L 41+ The touch screen 30 in this exemplary transaction sequence displays a screen which includes an icon which indicates in one or more languages that to commence a transaction a user should touch the screen.)

Art Unit: 3624

**Claim 9.** The method of claim 1, wherein receiving the entry of the user identification further comprises receiving the remote operator's entry of the user identification corresponding to a user entitlement.

( col. 12 L 44-52 .. the card input by a user or customer includes indicia which corresponds to an address associated with the user in the network. In such an embodiment the indicia corresponds to a uniform resource locator ("URL") address which provides information on the computer where the user information resides, as well as a directory or subdirectory which includes the user information and the name of the document or resource that includes the user information.)

**Claim 10.** The method of claim 9, wherein receiving the entry of the user identification further comprises receiving the remote operator's entry of at least one of a user ID and a password associated with the user entitlement.

(col. 14 L 55-67 ..As shown in FIG. 8, in this exemplary transaction the HTTP home server 90 then operates to send an HTML document to the browser 76 which includes instructions which when processed produce a page or screen which instructs the customer to enter their personal identification number or PIN.)

**Claim 11.** The method of claim 1, wherein receiving the entry of the user identification further comprises prompting the remote operator for selection of a preferred language.

(col. 11 L 41-44 The touch screen 30 in this exemplary transaction sequence displays a screen which includes an icon which indicates in one or more languages that to commence a transaction a user should touch the screen.)

**Claim 12.** The method of claim 1, wherein receiving the entry of the user identification further comprises verifying the user identification.

(col. 15 L 26- 29 The software operating in connection with HTTP server 90 is then operative to either verify the PIN itself or to verify the customer's PIN number and account number by sending it to the back office 94 and waiting for a response. Alternatively, customer PIN verification may be carried out in the ATM through an appropriate applet.)

Art Unit: 3624

**Claim 13.** The method of claim 1, wherein displaying the menu further comprises displaying the menu of terminal operator functions according to a predetermined user entitlement corresponding to the user identification.

(col. 16 L 32-47 The logic used in the profile applet may act to cause documents to be built or accessed for the customer which includes transaction options based on the customer information, information about the terminal and other factors. The profile applet may operate to offer transaction options or information selectively based on the customer information. For example, the operator of the machine may offer incentives, premiums, additional transaction options or advertising information selectively to customers. Certain types of customers of the institution operating the machine may receive screen outputs with options that encourage them to do more business or different types of business with the institution. Likewise, customers that are identified as customers of foreign institutions may be provided with incentives to do business with the institution operating the machine.)

**Claim 15.** The method of claim 1, wherein receiving the remote operator's selection further comprises receiving the selection according to a predetermined user entitlement corresponding to the user identification.

(see claim 13 analysis)

**Claim 16.** The method of claim 1, wherein allowing the remote operator to access the application for the selected function further comprises allowing the remote operator to access the application for the selected function according to a predetermined user entitlement corresponding to the user identification.

(see claim 9 analysis)

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3624

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 14, 17, 31 and 34 are rejected under 35 U.S.C.

103(a) as being unpatentable over Drummond.

While Drummond teaches the method for remote operator interface with a self-service financial terminal as discussed in the foregoing analysis, Drummond fails to teach displaying the menu of terminal operator functions as per claim 14.

Official Notice is taken that providing interface in the form of display menu that allows trouble shooting and diagnosis of operational problems associated with a computerized transaction device is old and well known. Various functions listed in the menu as per instant claims are well known to those who maintain the operational readiness of the transaction system such as an ATM.

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to provide the feature of displaying the menu of terminal operator functions such as those listed herein because this would enable convenient access to the hardware and software programs so tests required for operational readiness of the financial terminal can be ensured as matter of routine procedures.

System claims 18-34 have been analyzed as per respective method claims wherein the functional steps are performed by respective means elements.

All limitations of method claim 35 have been analyzed as per method claims 1-9.

Art Unit: 3624

**Conclusion**

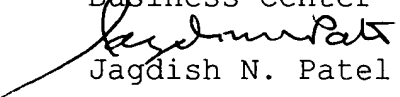

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAGDISH PATEL whose telephone number is (703)308-7837. The examiner can normally be reached on 800AM-600PM M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached on (703)308-1065. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
